Theme	4.2 Congress Thesis 2 – A strategy to develop the Space Renaissance, towards 2025
Abstract Title	A novel concept for a non-Newtonian electromagnetic space-drive
Abstract Code	SRIC3-SCT-4.2-02.049
Co-authors	Vladimir Onoochin

Abstract

A novel space-drive (thruster) concept which may provide a usable vectored thrust from simple coil geometry. We offer the concept of such a thruster based on an electromagnetic interaction retardation effect. This thruster does not rely on a conventional action-reaction propulsion system, but on a novel application of electromagnetic force.
